ATTACHMENT B
Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application.

1.   (Currently Amended) A computer system for storing and retrieving data, comprising:

an identifier including three or more variables for identifying each data stored in said computer system, wherein one of said at least three or more variables is a physical location variable.

2.   (Original) The system of claim 1, wherein one of said three or more variables is a device identification variable.

3.   (Original) The system of claim 2, further includes a timestamp for prioritizing said data.

4.   (Original) The system of claim 3, wherein one of said variables may be filled by a wildcard.

5.   (Original) The system of claim 4, wherein said system includes a registry for storing said data.

6.   (Original) The system of claim 5, wherein said registry is provided in a database structure.

7.   (Original) The system of claim 1, wherein said three or more variables includes a device identification variable, an application identification variable and a user identification variable.

- 1 -

8.   (Original) The system of claim 7, further including a timestamp for prioritizing data.

9.   (Original) The system of claim 8, wherein one of said variables may be filled by a wildcard.

10.   (Original) The system of claim 9, wherein said system includes a registry and said registry includes a database structure for storing said data.

11.   (Currently Amended) A computer registry for storing and retrieving preference data, comprising:

an identifier including at least three variables for identifying a data stored in said computer registry, wherein one of said at least three or more variables is a physical location variable.

12.   (Original) The registry of claim 11, further comprising a means for providing a floating value to said at least three variables.

13.   (Currently Amended) The registry means of claim 12, further comprising a means for associating a time stamp to said data.

14.   (Currently Amended) A method for storing and retrieving data in a computer system, comprising the steps of:

identifying each stored data in said computer system by an identifier including three or more variables, wherein one of said at least three or more variables is a physical location variable.

15.   (Original) A method according to claim 14, further comprising the step of storing data in a registry.

16.   (Original) A method according to claim 15, wherein one of said three or more variables is a device identification variable.

17.   (Original) A method according to claim 16, further including the step of time stamping said data for prioritizing said data.

18.   (Original) A method according to claim 17, further including the step of filling one of said variables with a wildcard.

19.   (Original) A method according to claim 18, further including the step of deleting one or more data items that has been superseded by a subsequent data having same identifier but a higher time stamp value.

20.   (Original) A method according to claim 19, wherein said registry is provided in a database structure.

21.   (Previously Presented) A system for storing and retrieving data as in claim 1 wherein said location comprised the locating a device.

22.   (New) A computer system as claimed in claim 1 wherein at least one of said stored data further includes preference data.

23.   (New) A computer registry as claimed in claim 11 wherein at least one of said data stored in said computer registry includes preference data.

24.   (New) A method according to claim 14 wherein at least one of said stored data includes preference data.
